NOTIFICATION

At the end of May Mr John Warrington, from the organization PSCA, called by phone to inform me that significant benefits were granted to us related to the title to placing our banner on their site. I would like to notify to you that on May 23rd he held me on the line for a long time and told me that I had to sign urgently the order if I wanted to get the benefit. He did not mention at any moment that the service had to be paid, and I signed the orders without reading them at all.

After several days he called asking from me to pay the order. I examined the orders and I found out that I had carelessly signed the orders. Immediately I electronically announced that I did not want their services and that I would not send any elements for placing the banner. I notified that I did not cause any expenses and that PSCA did not commence any operations for the Institute, and therefore, I did not have any obligations to the PSCA either they had any bases for claims.

Calls from a number of PSCA associates followed and permanent pressures were exerted on me to make payment. Ms Teresa Brigham informed me that she placed our banner on her site and I warned her in writing that she had done this not being authorised. Immediately after that the banner was deleted from the site.

Afterwards several persons several times per day called and asked from me to pay for something for what there was no bilateral agreement. Those calls have got the form of verbal terrorism. To each call we reply that there are no bases for claims. They are continually sending us invoices and ask for payments. Neither verbal nor written warnings sent to them to stop with this help, they think that they would get what they ask by making pressures.

By this I would like to emphasize publicly the inappropriateness of the practice of PSCA staff. At the same time I would like to call your attention to the danger to which those who might come into contact with them, are exposed.

Because of serious upsetting that unable us to work we shall take legal measures against them.
